Version History
liste loi ckuke'u

All versions include at least an up-to-date word list from the jbovlaste. Additionally, some versions contain new features:

- Version 1 (November 2008) was the first publication or this dictionary.
    - Nicely formatted dictionary, both English to Lojban, and Lojban to English.
    - List of Rafsi.
    - Invisible search strings for valsi and rafsi. For example, if you search for $perli$, you will get to the definition. Same thing if you search for per.
- Version 2 (December 2008) added the following:
    - Analysis of lujvo (in blue).
    - Links from the lujvo analysis, from the {See also} notes and from the list of rafsi to the appropriate definitions.
    - Error lists, so that readers may update jbovlaste.
- Version 3 (January 2009) added the following:
    - A cheat sheet with tenses and aspects.
- Version 7 (November 2009) added the following:
    - Bug fix for lujvo analysis. Still has some bugs - see for example feirmasti.

Note to Mac OS X 10.6 ("Snow Leopard") users:Preview.app has changed in a way that makes searching not work. To keep searching for terms like $be'o$, please use Acrobat Reader from http://www.adobe.com, or Skim from http://skim-app.sourceforge.net
